

Trackstack

Reaching new heights

Ease of Use

The EC approved Trackstack conveyor range features a hydraulic head section allowing for quick, efficient compact road transportation as well as allowing for a rapid set up time and ease of movement at its final job destination.

Controls

Easy to use fully operational dog lead remote control allowing for versatility and outstanding manoeuvrability.

Power Pack

The Trackstack range of conveyors are powered by a Deutz 4 cylinder Diesel Powerpack, directly linked to the hydraulic pump in order to drive both the numerous motors and the hydraulic folding mechanism.

Chassis

With its powerful chassis and heavy duty tracks the Trackstack unit ensures optimum stability and strength regardless of its applications.

Ballast Weights

With ballast weights at the rear of the Trackstack unit movement is extremely flexible when fully extended.

Versatility

The exceptional design of the Trackstack range of conveyors allows for tail drum height adjustment whilst at the same time maintaining the head drum height therefore allowing for an increased stockpile capacity. With an adjustable feed boot height the Trackstack unique design is unrivalled in its field. This single man conveying operation can receive crushed material and safely stockpile over a quarry face or bench. Its versatility allows for any application whether it be stand alone crusher fed, or installed in a close circuit application dealing with crushed stone, sand and gravel, crushed glass, coal and bark etc.

Machine Specifications

	8042T	6536T
Belt Width	1050mm	900mm
Belt Length	23500mm	18700mm
Max Discharge Height	11.33m	8260mm
Max Conical Stockpile Capacity	2162 cubic metres / 3460Tonnes @1.6T/cu.M	970 cubic metres / 1552 Tonnes @1.6T/cu.M
Transportation Length	12000mm	11700mm
Transportation Height	2591mm	2591mm
Track Width	2200mm	2200mm
Machine Weight	15,500 kgs	12,000 kgs

Options

- Dust Covers
- Dust Suppression System
- Discharge Dust Chute
- Picking Platform
- Full Radio Remote Controls
- Direct Feed 7m3 Hopper

Applications

- Sand and gravel
- Crushed aggregate
- Bark
- Glass
- Top soil
- Coal
- Bulk loading

8042T transport

8042TDF Direct Feed Hopper Option

6536T

Production Capacity up to 600 Tonnes per hour

Features and Benefits

- Low cost stockpiling solution with today's ever increasing fuel prices
- Optimum flexibility and mobility with the highest possible performance
- Heavy duty steel construction
- Compact transport dimensions
- Quick set up time
- Proven reliability
